Category: Utilities, Tools, File size: 4.74 MB, Platform: Windows 8 64 bit I missed you! I am happy to see you again! I often read reviews that compare your products to well-known - not only home but also enterprise - PC backup and security products. Your product line has improved in my opinion. Years ago, your products were too superficial and aimed at the lowest common denominator. The above-mentioned products had a lot more features and a more elegant interface. Now your product line looks better, more elegant, and more serious than your competitors. The fact that your products are less expensive, more affordable, and easier to use promotes their popularity. I am happy to find such a user-friendly and reliable product. These products are important for home users. But your product is not only a backup solution. You have added such important features as wireless support, innovative log management, and powerful encryption capabilities. These features make your product more useful to people, including me. Don't waste your time, look around. We are very proud to have you at our site. Keep up the good work. I wish you good luck! Hello, I saw your web site for the first time today. My name is Sergey and I am not a Microsoft specialist. This is a PC maintenance blog, which I want to share with all of you. I also have a number of free programs for Windows. I invite you to check them out. Thank you for your attention. You have received a lot of suggestions. I agree with all of them. I have developed Folder Vanity Remover for your convenience. I understand it is good to have a product that is targeted to the most common users. I also understand that it is frustrating to have to use a search tool to find a particular program. I am very glad that you like my product. I also appreciate your suggestions. They are always useful. The development of Folder Vanity Remover was a long process. There were certain moments when I was not sure whether it would get to its destination. Fortunately, it did. You are also right about lack of information. There's no web site or help file provided. But you can contact me personally. Just send me an e-mail with your address. Then I will send you the product key. I am glad to share the news with you that the product is now available for purchase.
